

Pain management - a continuing concern for DomusVi

WOMEN, MEN, ONE PROFESSION

DomusVi is first and foremost the men and women who have, since 25 years, contributed to the establishment's success.

Our business, which is witnessing constant change, must be continuously upgraded and protected when it is practiced with a sense of ethics and of compassion, two values at the heart of DomusVi's actions.

Today, DomusVi manages over 120 establishments providing accommodation or hospitalisation services as well as services dedicated to the Elderly, and employs 7000 persons in France and Quebec. On a daily basis, within these establishments, teams made up of men and women devote their entire professional life to assisting the elderly in vulnerable situations due to their age and dependency. Nursing homes have dedicated teams of doctors, nurses and assistant nurses providing care and services to the residents. Teams providing home services contribute to both personal wellness and personal safety, and coordinators monitor each service provision while being attentive to clients' needs.

Diversity is the wealth of DomusVi, for the benefit of its clients, patients and residents everywhere in France and in Canada.

In the Maritime Alps, the DomusVi Côte d'Azur network offers you:

- Clinique du Parc Impérial (Nice)
- Hôpital Privé Cannes Oxford (Cannes)
- Clinique Le Méridien (Cannes La Bocca)
- Clinique du Palais (Grasse)
- CSR Les Magnolias (Saint Laurent du Var)
- CSR DomusVi Wilson (Antibes)
- Nursing Homes for the Dependent Elderly, Tiers Temps Cannes
- Nursing Homes for the Dependent Elderly, Tiers Temps Le Cannet
- "Conciergeries" (home care and support services) in Antibes, Cannes, Grasse, Nice and Saint Laurent du Var.

PROVISION OF COMPREHENSIVE CARE SERVICES

DomusVi Cliniques provides individual and personalised care services, CUSTOMISED CARE SERVICES FOR FOREIGN PATIENTS.

- The "all-inclusive" package includes:

- For the most common surgical interventions: cataract operation, carpal tunnel release, hip prosthesis, knee prosthesis, disc hernia, vein ligation and stripping, inguinal hernia, amongst others.
- For common tests: colonoscopy, gastroscopy, knee and shoulder arthroscopy.
- For specific and more complex interventions (spine surgery for example), our proposal is customised to meet your needs.

- Each intervention is subject to a detailed quote. This quote is given to the patient prior to hospitalisation for his approval of the intervention. All treatments and tests that need to be carried during the patient's stay are clearly

mentioned and the price is specified in the quote. The final bill is handed over to the patient on the day of his departure. The medical and surgical services (fees for the surgeon, anaesthetist and other specialists involved in the treatment) and the hospital's services (special room with hotel-style services) are included in the quote.

DomusVi Cliniques creates partnerships with foreign mutual insurance companies and private insurance companies. Through these patients do not need to pay in advance for costs which are directly paid for by the insurance company.

A Coordinator, fluent in English and Italian, is at your service before, during and after your stay, in order to assist you in organising your stay and during your stay with us.

We also offer a range of additional services to assist you in organising your trip (booking of air tickets, airport transfer in taxi or limousine with or without a driver, car rental) and any other activity (trips, visits, booking of appointments, etc.) in order to ensure that your stay, as well as that of those accompanying you, is as enjoyable as possible.
